

DT-11 Digital thermometer

High class digital thermometer
with PT1000

Precise digital measuring device DT-11

High class precise measuring device which can be used in many different industries like Pharmacy, Laboratory, Transport and Gastronomy. The device is powered from battery. Comes with integrated probe which can be folded.

Technical data

Temperature range	-50°C to 270°C
Sensor Type	platinum PT-1000
Operating temperature	-20 °C to 60 °C
Accuracy	-/+0.05°C (0°C to 100°C)
Dimensions	154x37x16mm
Protection	IP65-electronics
Power	Battery power supply 3.7V 400mAh
Charging time battery Li-ion	1.5 hours
Case material	ABS
Sensor's Cover material	acid-resistant steel SS 321
Probe length	110mm
Probe diameter	ø3.3 mm

DT- 11 Features:

- Screen with backlight
- Light weight (70g)
- Compact shape and ergonomic design
- Micro usb charging port
- Working time on a single charge 1440 hours
- Simple to use
- Low battery indication
- Integrated probe
